

Crown Express Document Imaging

Uniquely designed to put your images out there.

Document Imaging for Crown Express is an integrated technology that has been designed to allow you to easily search and retrieve scanned paperwork. Reducing filing costs and putting the images in the hands of your customers allows you to increase productivity and offer excellent customer service.

- Powerful search engine allows employees to easily retrieve scanned shipment paperwork from their workstations for viewing and instant e-mailing to customers
- Filing paperwork via scanned images eliminated the costly expense of copy machines and manual sorting
- Customers can instantly view and print shipment scanned images online using CrownConnect shipment tracking website
- Scanned documents can be sent directly to many of the leading freight forwarders' computer systems via EDI including AIT, Expeditors and Pilot Air

With Document Imaging for Crown Express you can put your shipment images easily into the hands of those that need it most. Document Imaging from Crown Express will streamline your filing process, giving you more time for the things that really matter.
