DATA SYSTEMS

Document Imaging

Document Imaging is a uniquely integrated technology resulting in increased productivity, cost reduction and excellent customer service.

- Powerful search engine allows employees to instantly retrieve scanned shipment paperwork from their workstations for viewing and instant emailing to customers.
- Filing paperwork by scanned images eliminates the costly expense of copy machines and the manual sorting of original copies.
- Print or email invoices with copies of the scanned shipment documents and eliminate the need for sending copies of the original supporting documents.
- Your customers can instantly view and/or print shipment scanned images online using the CrownConnect shipment tracking website.
- Scanned documents can be sent directly into many of the leading freight forwarders' computer systems via EDI including AIT, Expeditors and Pilot Air.
