

Crown Dock Manager

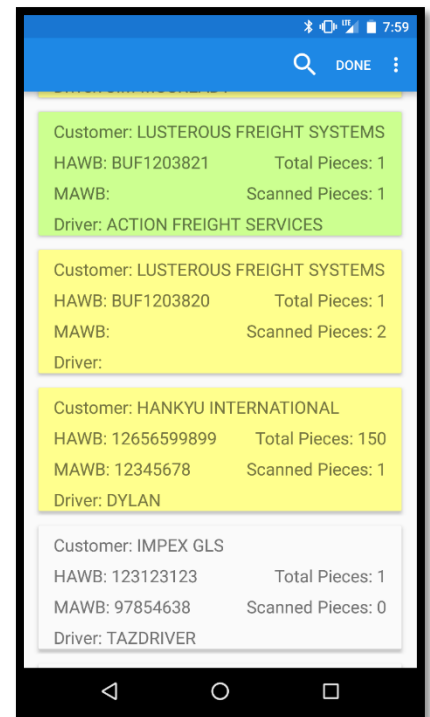

Giving you complete control of your dock.

The new Crown Data Systems Dock Application is a tool giving you and your employees the easiest scanning and shipment process yet. The Dock Worker Tablet Application puts the power in the hands of your workers, pairing with a handheld Bluetooth scanner to retrieve and send information directly from barcodes.

- Scan freight arriving at the dock, automatically marking shipments on-hand
- View shipment location in warehouse
- Take photographs, make notes and mark shipments OS&D from tablet
- View driver assignment
- Generate dock scan reports
- Scan barcodes directly from shipper's paperwork with handheld scanner (requires shipper compatibility)
- When a barcode is unavailable dock workers may enter a HAWB/MAWB to retrieve the shipments, entering number of pieces while marking On Hand and OS&D when applicable

Handheld Scanner connected by Bluetooth wirelessly sends information to your Crown system.
